I-95 Nightwork Scheduled for the Next Few Weeks

Wilmington – The Delaware Department of Transportation (DelDOT) would like to provide information regarding upcoming nightwork scheduled along the I-95 Wilmington Viaduct over the next few weeks.

Kiewit Construction will begin “hydro-demolition” of the existing concrete roadway surface between the hours of 6pm and 6am along the I-95 Viaduct. This work consists of using a water-blasting technique to remove the top few inches of existing concrete and then using a vacuum truck to remove the debris in preparation for a new concrete overlay. The work is being scheduled at night to increase productivity and to maintain the overall project schedule.

The proposed schedule calls for work to be performed in Sections 2 and 3 between 9/14/21 and 10/1/21. This is a moving operation heading from north to south in each section, so it will not be continuously located in any single area.
